

Case summary

Window 2026-03-04 17:48:36 to 2026-03-06 04:16:39 - amount 70,386.91 - generated from the transaction graph, not hand-written.

Between 04 Mar 2026 and 06 Mar 2026 (1.4 days), 6 accounts at BankB passed roughly 70,387 around a closed loop: the money left the first account, moved through 5 intermediaries, and returned to where it started, keeping 90% of its value after fees. Round-tripping money like this through several accounts is a classic way to obscure where funds came from.
